**OUR PASSION. OUR LOVE.
OUR MISSION.**

No Paws Left Behind, Inc. is a focus driven not for profit organization, designed to bring awareness to all communities the silent victims of foreclosure who have no voice or rights to implement change. As a united front, we will restore moral obligations toward all pets that have the potential to be or have been left behind to suffer needlessly. We further pledge to act as a support group for those who find foreclosure imminent and need help to find shelter for their beloved pets; be a resource for those who find or know of abandoned pets; and last but by no means least, unite and create a national movement targeting lawmakers to change the laws and remove pets being categorized as personal property in order to end needless suffering.

Foreclosure pets who were once vital part of a happy family suddenly find themselves alone, helpless, and in many cases, starving due to foreclosure. Most owners never intended for the end of a relationship that was once loving to turn abusive but it's important to understand the emotional toll it takes on a family to lose a home. It's not always easy to find a good home for pet or possible to take a loyal friend along to a new home or a temporary stay with relatives.

The misconception that homeowners are thrown out of homes with their belongings thrown on the curb only adds to the sense of urgency to leave and hope for the best for their pet. Many times, an animal who has become a part of the family is not taken to a shelter for care for fear of the pet being euthanized.

But there are choices and there are solutions. No Kill shelters will always find adoptive families and good homes for paws that are left behind. Foster care is available for temporary care until permanent living solutions are found. No Paws Left Behind, Inc. can help provide monetary assistance for pet deposits required by new landlords. We are here to help.
