

# What Animals Tell Us

## **Black Dog\_093009**

*(...Before everyone got organized and united as one in her rescue effort.)*

*She begins:*

I am shy and nervous and now I am utterly scared.

### **About what?**

My life is in danger, I feel.

### **So you care about your life?**

Absolutely. I am here and serve a purpose too.

### **That's good to know.**

### **Have you been chased recently?**

I have been hounded and maneuvered very strongly. I don't see any reason to believe differently.

### **Believe differently about what?**

That someone wants me dead. I'm not totally useless, you know. I am here to serve a purpose. My light shines forth, despite all of it. What kind of reality is this, anyway? *Now this?*

**I know. It is wrong and it is cruel, but there is something I must tell you. Many people want you to stay here and be safe. But others do not understand your message. THEY are the ones placing you in this position. We are concerned—those of us who are the good ones. We want to find a way for you to be able to identify the good ones and stay away from the bad ones. How to do this, we don't know yet. Can you try to be very cautious until then?**

How do I do this? I don't know the difference.

**I know. We will work on it and let you know.**

**For now, please be extremely careful.**

### **How do you feel about what happened?**

I felt my life was in great danger. I ran as fast as I could. I don't know what to do now except to stay away from people. I do not deserve this. I truly do not. My spirit is already broken. What more do they want? I am harmless, I truly am. I do not wish to generate sorrow. My main goal is to be left in peace.

### **So you do value your life?**

Well, it is a little precarious. I feel that is necessary to live to accomplish my goals. It's an uncertain future but not one I am done with yet.

### **That's very good to hear.**

**There will be a lot of things to do, Black Dog. It will need to be done in steps. First, we have to try to get others to cooperate. This may be the hardest part because you will not be able to tell who is who. For now, please be very careful with EVERYTHING; where you are eating food and who you see. It's going to be hard because even we don't know who is objecting to your presence. We are trying to find out. We will help you if you want it. Do you see that some of us are good?**

I am learning that, yes; but I still don't believe anybody. I have not committed a crime.

**Yes, we know that and accept you as you are.**

# What Animals Tell Us

**Can you please be careful of traps, too? They are VERY bad things for you at this time.**

I know. I don't want one. I am stuck.

**Ok. So then wait until we figure out what to do and until then please be careful of everything. Stay clear of food that is in traps or even if you find it somewhere else and it smells bad or doesn't seem right.**

**Black Dog—we do care. We will try to guide you to safer territory.**

I know I have to protect myself. I cannot polarize another community again.

I know I am here to help somehow.

**Do you think you could eventually learn to go to one place for food , water, and safety?**

I don't know; it's too complicated right now.

**Ok—I'll be back soon.**
